Summary

Motivated and enthusiastic BCA student with strong interest in software development, web technologies, and AI-powered applications. Experienced in building real-world projects using HTML, CSS, JavaScript, TypeScript, Firebase, and GitHub. Seeking opportunities to enhance technical skills, contribute to innovative projects, and gain industry experience.

Education

2024 - 2028

● **Mandsaur University, Madhya Pradesh**
Bachelor Of Computer Applications (BCA)
CGPA - 8.45

Certification

Introduction to Microsoft 365 Copilot

Completed certification covering AI-powered productivity tools and Microsoft Copilot fundamentals.

Skills

- C
- JavaScript
- TypeScript
- HTML
- CSS
- Firebase
- GitHub
- GitHub Pages
- Web Development
- Authentication System
- AI Applications
- Attendance Management System

Projects

SmartAttend – Multi-University Attendance Management System

🔗 [Project Link](#)

- Developed a web-based attendance management system for universities and colleges.
- Features include attendance tracking, student management, and faculty dashboards.
- Designed to support multiple institutions through a centralized platform.

BiasGuard AI

🔗 [Project Link](#)

- Developed an AI-powered system to detect and explain bias in datasets.
- Built primarily using TypeScript.
- Participated in hackathon and innovation challenges using this project.
- Focused on fairness, transparency, and responsible AI.

GestureClip

🔗 [Project Link](#)

- Created a gesture-controlled web application.
- Implemented browser-based interaction using hand gesture recognition concepts.
- Demonstrated innovative human-computer interaction techniques.
